MAIL STOP REISSUE

August 21, 2003

Sir:

Transmitted herewith is an application for reissue of U.S. Patent No. 6,278,688 B1, issued August 21, 2001; for Procedure for Ensuring the Operation of Signalling Channels in a V5 Interface. The applicant(s) of this reissue application are Jyrki SUUTARI; Toivo LALLUKKA; Arto RUKAJÄRVI; and Olli LIINAMAA. The reissue application, like the application upon which U.S. Patent No. 6,278,688 B1 was based, continues to claim priority from International Application No. PCT/FI98/00198 filed on March 5, 1998. Applicants also claim priority from Finland Application No. 971142 filed March 18, 1997 under 35 USC § 119.

Enclosed are the following::

- (1) Reissue Application (4 pages); and
- (2) Preliminary Amendment.

This reissue application is being filed because it is believed that the original patent is partially or wholly inoperative invalid by the patentees claiming less than they had a right to claim. It is further believed that the error arose without deceptive intent on the part of the applicants.

The filing fee is calculated as follows:

	Claims Present	Patent Claims	Additional	Fee per Claim	Total Fee
Total Claims	5	5	0	x \$18.00	
Independent Claims	1	1	0	x \$84.00	
Reissue Filing Fee					\$ 750.00
Multiple Dependent Claims Fee \$280.00					
Total					\$750.00

☒ A check for the filing fee is not enclosed at this time.

Respectfully submitted,

 Douglas H. Goldhush
